SUMMARY

Computer Science student and full-stack developer passionate about building end-to-end web applications that are fast, secure, and genuinely useful. Experienced across both sides of the stack — designing clean, responsive interfaces with React.js and Tailwind CSS, and building reliable backend services with Node.js, Express, and RESTful APIs. Google Cloud Certified Professional Cloud Architect with additional industry credentials from Deloitte and Tata Group. Actively seeking internship and full-time opportunities in web development.

PROJECT EXPERIENCE

VendorBridge — Procurement & Vendor Management ERP

2025 – 2026

Full-stack monorepo ERP for end-to-end vendor and procurement management

- Built VendorBridge, an end-to-end Procurement & Vendor Management ERP covering purchase requisitions (RFQs), vendor quotations, side-by-side comparisons, manager approvals, purchase order generation, invoice settlements, and audit logs.
- Architected the project as a Turborepo + pnpm Workspaces monorepo with a Node.js/Express REST API backend and a Vite-bundled vanilla HTML5/CSS3/JS single-page application frontend.
- Designed the PostgreSQL data layer (Supabase-hosted) with Row-Level Security (RLS) policies to enforce role-based data access across Procurement Officer, Manager/Approver, Vendor, and Administrator roles.
- Implemented custom JWT-based session authentication with role-based routing, plus transactional email flows (welcome, OTP, password reset, purchase orders) using Nodemailer.

Node.js • Express • PostgreSQL • Supabase • JWT Auth • Vite • pnpm • Nodemailer

Interview Platform (Client–Server Web App)

2025 – 2026

Full-stack JavaScript application with a dedicated client and server architecture

- Developed a client-server web application with a clearly separated client and server codebase, structured for maintainability and independent deployment.
- Built the majority of the application logic in JavaScript, integrating HTML/CSS for a responsive, functional interface.
- Iterated across 12+ commits to progressively add features and refine the client-server interaction, reflecting an agile, incremental development workflow.

JavaScript • HTML • CSS • Client-Server Architecture

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Design, Vite

Backend & Frameworks: Node.js, Express.js, REST APIs, Authentication, CRUD Operations

Database: PostgreSQL, Supabase (with Row-Level Security)

Tools & Platforms: Git, GitHub, Vercel, Render, Nodemailer, JWT Authentication

EDUCATION

Bachelor of Engineering in Computer Science

2024 – 2028

LDRP Institute of Technology & Research, Gujarat Technological University (KSV)
